¹ Annual point-to-point and 2-year point-to-point crediting methods are subject to an allocation charge, deducted annually from the contract's accumulation value and guaranteed minimum value (in most states). The current allocation charge percentage is 0.95%. After contract issue, the allocation charge percentage can only change when specified criteria are met and can never be greater than the maximum allocation charge percentage of 2.5%. The specific criteria we monitor are the annual average US 10-year Treasury rate for the calendar year, corporate bond downgrades for the calendar year, and investment-grade corporate bond defaults for the calendar year. We chose these criteria because they are related to the performance of the assets we use to provide the guaranteed portions of our fixed index annuities. Keep in mind that if the charge is triggered and implemented on the product, it may persist beyond the market conditions that triggered the charge. For more information refer to M-7381

that are not included in similar annuities that don't offer a bonus. The bonus is credited each year the selected allocations earn interest. During the first 10 contract years, we will apply a surrender charge if the contract is partially or fully surrendered. These charges may result in a loss of indexed interest and fixed interest bonus and a partial loss of principal (premium).
