Offer clients a powerful combination for retirement

To prepare for a strong financial future, it's important to consider a retirement savings vehicle that can help clients build more assets for retirement. **The Power Series of Index Annuities**[®] offer clients the opportunity to:

- **Grow** their retirement assets with potential interest¹ from index interest accounts that are based in part on the performance of the:
 - S&P 500[®]
 - Russell 2000[®]
 - MSCI EAFE
 - AQR DynamiQ Allocation Index[®]
 - PIMCO Global Optima Index[®]
 - ML Strategic Balanced Index[®]
- **Accumulate** more assets for retirement through the power of tax deferral.
- **Protect** their principal against market loss with a fixed interest account and 8-9 index interest accounts, depending on the annuity selected.

In addition, through the **Lifetime Income Choice**[®] guaranteed living benefit rider, both Power 7 Protector Plus Income[®] and Power 10 Protector Plus Income[®] can help clients generate income that may fit their needs.²

Contact your insurance representative for more information.

¹ Interest is not earned in down markets. The MSCI EAFE, Russell 2000[®] and S&P 500[®] are price return indices and do not include dividends.

² For Power 7 Protector Plus Income and Power 10 Protector Plus Income, Lifetime Income Choice is automatically included for an annual fee. Restrictions and limitations apply.

Important Information about Selling Index Annuity Products

Index annuity products are fixed deferred annuities, and it's important that producers properly position these products when selling them to clients. Index annuities are not subject to federal and state securities registration requirements, so it's important to understand that the way in which a product is marketed can directly impact the determination of whether it is considered to be a security. Therefore, all producers should be aware of the following guidelines for marketing index annuity products:

- Index annuity products should be properly positioned as fixed deferred annuities and not as any other kind of product.
- They should not be marketed as being equivalent to, or as a substitute for, equity investments (such as mutual funds, securities, an investment in the market, etc.).
- The marketing and sales process should speak to the guaranteed features of the product without unduly emphasizing the possibility of index interest crediting or implying any linkage to equities.
- The overall focus of any marketing, including any sales presentations, should be the long-term retirement aspects of index annuities, such as minimum guaranteed surrender values, annuity payout options and the safety and stability of insurance products in general.

Key Terms and Definitions

AQR DynamiQ Allocation Index®: A multi-style index that seeks to maximize returns through efficient and well-diversified exposure to global equity and fixed income markets.

Excess Withdrawal: Any withdrawal in excess of the Maximum Annual Withdrawal Amount.

GLB Rider Activation: The decision to activate or turn on the rider's stream of guaranteed lifetime income. Clients must notify us in writing to begin taking lifetime withdrawals.

Income Base: The value on which guaranteed withdrawals and the rider fee are based; it is not used in the calculation of the contract value or any other benefits under the contract, and cannot be withdrawn partially or in a lump sum.

Income Credit: The amount that may be added to the Income Base on contract anniversaries.

Income Credit Base: A component of the rider that is used to calculate the annual income credit.

Index Rate Cap: The maximum amount of interest that can be credited to an index interest account over an index term.

Maximum Annual Withdrawal Percentage: The maximum amount of income that can be taken each year once the rider has been activated without reducing the Income Base and Income Credit Base.

ML Strategic Balanced Index®: A hybrid index that seeks growth and risk management by actively allocating to equities, fixed income and cash. Allocations between equities and fixed income are rebalanced semiannually, while cash positions are adjusted on a daily basis to help manage risk.

MSCI EAFE: An equity index that tracks the performance of international stocks, excluding the U.S. and Canada.

Participation Rate: The percentage of the positive movement of an index that is used to calculate the interest earned in the contract.

PIMCO Global Optima Index®: A quantitative, rules-based index that seeks to provide upside return potential by dynamically adjusting its allocations to a diverse range of global equity and U.S. fixed income markets.

Protected Income Payment Percentage: The guaranteed percentage of income that clients will receive each year once the contract value is depleted when Lifetime Income Choice is selected.

Russell 2000®: An equity index that tracks the performance of U.S. small-cap stocks with market capitalizations that average \$2 billion.

S&P 500®: An equity index that tracks the performance of 500 of the largest companies in the U.S. It is widely regarded as the standard for measuring the performance of the U.S. stock market.

Spread: Minimum percentage or threshold that the index's performance must exceed to be credited interest.

The participation rate is set at 100% for the index interest accounts subject to an index rate cap and is guaranteed for the life of the contract. The rates for the participation rate accounts range from 5% to 100%. Index rate caps, participation rates and spreads may vary based on the guaranteed living benefit rider elected and the amount of premiums received. Renewal caps, participation rates and spreads may be set higher or lower than the initial rate. See the current rate flyer for more information. Index interest accounts may not be available in all states.

*The MSCI EAFE, Russell 2000® and S&P 500® are price return indices and do not include dividends.

**Both the ML Strategic Balanced Index® and the AQR DynamiQ Allocation IndexSM embed an annual index cost in the calculations of the change in index value. This embedded index cost will reduce any change in index value, and it funds certain operational and licensing costs for the indices. Since it will affect the return of the indices, it may also impact the amount of interest credited to an index annuity; however, it is not a fee paid by the client or received by the issuing insurance company.

Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, without the risk of loss of premium due to market downturns or fluctuations. Index annuities may not be appropriate for all clients.

Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if clients make withdrawals or surrender their annuity before age 59½. Clients should consult a tax advisor regarding their specific situation.
