<sup>1</sup> Annual point-to-point, MY 2-year point-to-point, and MY 5-year point-to-point crediting methods are subject to an allocation charge, deducted annually from the contract accumulation value and guaranteed minimum value (in most states). The current allocation charge percentage is 0.00%. After contract issue, the allocation charge percentage can only change when specified criteria are met, and can never be greater than the maximum allocation charge percentage of 2.5%. The specific criteria we monitor are the annual average U.S. 10-year Treasury rate for the calendar year, corporate bond downgrades for the calendar year, and investment-grade corporate bond defaults for the calendar year. We chose these criteria because they are related to the performance of the assets we use to provide the guaranteed portions of our fixed index annuities. Keep in mind that if the charge is triggered and implemented on the product, it may persist beyond the market conditions that triggered the charge. For more information refer to M-7381.

<sup>1</sup> The annual rider charge is deducted on a monthly basis from the accumulation value and guaranteed minimum value (in most states). The initial rider charge percentage is guaranteed for the first contract year. After the first contract year, the rider charge percentage can change each contract year, but will never be greater than the maximum rider charge percentage of 1.25%.

The caps, spread, participation rates, and interest rate specified above are set at issue and guaranteed for the first crediting period. Subsequent rates will be set on each contract anniversary. The minimum annual cap for the annual point-to-point with a cap crediting method is 0.25%. The maximum annual spread for the annual point-to-point with a spread crediting method is 12%.

The minimum participation rate for the annual point-to-point with a participation rate and the 2-year point-to-point with a participation rate crediting methods is 5%. The minimum fixed interest rate is 0.10%. Rates may vary by state.

The maximum rider charge percentage and lifetime withdrawal percentage table are set at issue based on the date Allianz receives the application and are guaranteed for the life of the contract.

The indexes available within the contract are constructed to keep track of diverse segments of the U.S. or international markets, or specific sectors. These indexes are benchmarks only. Indexes can have different constituents and weighting methodologies. Some indexes have multiple versions that can weight components or may track the impact of dividends differently. Although an index may affect your interest credited, you cannot buy, directly participate in, or receive dividend payments from any of them through the contract.
