¹The bonus is subject to a 10-year vesting schedule. 10% of the bonus will become vested on each contract anniversary until the beginning of the 11th contract year, when 100% will be vested. If you withdraw your contract before the 11th contract year, you will lose the unvested bonus. During the first 10 contract years, we will apply a withdrawal charge, market value adjustment, and unvested bonus reduction if you partially or fully withdraw your contract. The same would apply if you begin annuitization, which means receiving regular annuity payments over a specified period of time, prior to the sixth contract year. These charges may result in a loss of bonus, indexed interest and fixed interest, and a partial loss of principal (your premium). Bonus annuities may include higher withdrawal charges, longer withdrawal charge periods, lower caps, lower participation rates, or other restrictions that are not included in similar annuities that don't offer a premium bonus feature.

Index Lock	<p>With both annual point-to-point with a participation rate and MY point-to-point with a participation rate, you have the ability to lock in a credited rate on any of your individual indexed allocation(s) at any point during the crediting period, as long as the change in the external index is positive. Once it's locked, that index value will determine how much interest you will receive at the end of your crediting period (subject to applicable participation rates).</p> <p>See CSI-504 for Index Lock details.</p>

The withdrawal charge and withdrawal charge period apply to the accumulation value.¹</p>																								
Market value adjustment (MVA)	<p>If your client partially or fully withdraws their annuity, it will be subject to an MVA during the withdrawal charge period. An MVA will also apply if annuity payments begin prior to the fifth contract anniversary. An MVA is not applied to free withdrawals or Required Minimum Distributions (RMDs).</p> <p>An MVA is a calculation used to adjust the contract values according to corporate bond yields at the time the withdrawal is taken. The MVA may increase or decrease the contract's cash value. The MVA can never cause the cash value to be less than the guaranteed minimum value or greater than the accumulation value.</p>																								
Unvested bonus reduction	<p>Premium bonuses are vested at a rate of 10% each contract anniversary, and become fully vested at the beginning of the 11th contract year. ¹ Both the premium bonus and interest bonus are credited only to the Protected Income Value (PIV). To receive the PIV, including the value of these bonuses, lifetime withdrawals must be taken. The PIV is not available as a lump sum. You will not receive these bonuses if the contract is fully surrendered or if traditional annuitization payments are taken. If it is partially surrendered the PIV will be reduced proportionally, which could result in a partial loss of bonuses. Lifetime withdrawals are considered partial withdrawals and are subject to ordinary income tax and, if taken prior to 59½, a 10% federal additional tax. Because this is a bonus annuity, it may include higher surrender charges, longer surrender charge periods, lower caps, lower participation rates, or other restrictions that are not included in similar annuities that don't offer a bonus feature.

² The Bonus Control Benefit Option is applied to the contract allocation(s) at the beginning of a Crediting Period. In AK, CT, HI, NJ, PA, UT and WA, the difference between 100% and the Accumulation Value Interest Factor is called the Accumulation Value Interest Charge Percentage.

³ In Alaska, Connecticut, Hawaii, Maryland, New Jersey, Oregon, Pennsylvania, Utah, and Washington, the PIV death benefit limit is the greater of 125% of the cash surrender value, or total premium credited at 10% interest per year, but not exceeding 250% of the total premium (less withdrawals).

Purchasing an annuity within a retirement plan that provides tax deferral under sections of the Internal Revenue Code results in no additional tax benefit. An annuity should be used to fund a qualified plan based upon the annuity's features other than tax deferral. All annuity features, risks, limitations, and costs should be considered prior to purchasing an annuity within a tax-qualified retirement plan.

Guarantees are backed by the financial strength and claims-paying ability of Allianz Life Insurance Company of North America.

Distributions are subject to ordinary income tax and, if taken prior to age 59½, a 10% federal additional tax.

Allianz 360TM Annuity

Product characteristics	<p>The Allianz 360TM Annuity is a fixed index annuity with a benefit rider (the “360 Benefit”). The 360 Benefit rider offers an interest bonus each time interest is credited until income withdrawals begin. It also offers an increasing income withdrawal percentage beginning at age 40 and continuing every year until income withdrawals begin. Plus, there is a choice of two lifetime income payment options, including payments with the opportunity to increase.</p>
Purchase payment	<p>Initial minimum: \$20,000 qualified and nonqualified Additional premium accepted through the first 18 months of the contract</p>
Issue ages	<p>0-80</p>
360 Benefit rider	<p>The 360 Benefit rider is included with the Allianz 360TM Annuity for an additional charge. It helps clients address both halves of retirement: accumulating retirement savings and receiving income in the form of lifetime withdrawals. It offers an interest bonus and increasing income withdrawal percentages (beginning at age 40) until income payments begin. It also offers a choice of two income payment options, available as early as age 50: predictable payments and payments with the opportunity to increase.</p>
Interest bonus	<p>An interest bonus providing a credit of 105% of any fixed and/or indexed interest earned is applied to the accumulation value of the contract until lifetime withdrawals begin or until the 360 Benefit rider is terminated, whichever comes first. The interest bonus will be calculated after any cap or participation rate is applied. Surrendering the contract in the first 10 contract years or not taking a standard annuity option may result in a loss of previously credited interest bonuses.</p>
Increasing withdrawal percentages	<p>Beginning at age 40, the contract’s lifetime withdrawal percentages will automatically increase each year your client accumulates, until income payments begin. The base payment percentage is determined by the age of your client at the time they purchase the annuity. Starting at age 51, the base payout percentages at issue increase 10 bps for every year of age.</p>

<p>360 Benefit rider cost</p>	<p>The annual cost is 0.95% of the accumulation value, deducted on a monthly basis from the accumulation value and the guaranteed minimum value (in most states). After the first contract year, the annual Benefit rider charge can change, but it will never be greater than the maximum Benefit rider charge of 3%. The rider charge will continue until the earliest of when the accumulation value is equal to zero, annuity payments begin, or the rider terminates.</p>																																																
<p>Rider cancellation</p>	<p>The contract owner can cancel this rider at any time after the fifth contract year. Once the rider is canceled, it may not be reinstated.
