

MYGA Plus™ Rate Sheet

Annuity: Single Premium Deferred

NEW CONTRACT RATES

Effective 10/02/25: Rate Increase on 3-Year, 5-Year and 7-Year

The MYGA Plus™ is a multi-year guaranteed, single-premium deferred fixed annuity with an Index-Linked Option offered by Ibexis Life & Annuity Insurance Company®. At its core, the MYGA Plus™ functions like a traditional multi-year guaranteed annuity (MYGA) product: it offers a Fixed Option that credits a simple guaranteed interest for a specific time (known as a Guaranteed Option Period or GOP). In addition, the MYGA Plus™ offers an additional premium allocation option. In the same contract, the client may also allocate up to 50% of their premium to an Index-Linked Option, which credits a guaranteed fixed amount if the S&P 500® increases during any annual period.

Fixed Option

Pays simple interest as stated as an annual rate and this interest is credited to the contract value daily. This interest rate is locked in for the Guaranteed Option Period (GOP) selected and will not change during that time.

Index-Linked Option

Offers a fixed annual rate that will be credited only if the tracked index (currently the S&P 500®) is higher than the previous year on a point-to-point basis. This is evaluated each year on the contract anniversary. If the index is higher than the previous year's value in any amount on the anniversary, the Index-Linked Option rate will be credited to the client's contract value based on the amount of premium allocated to the Index-Linked Option. Allocation can be between 0% to 50% of the total premium.

At the end of the GOP, the client has a 30 day window to either renew into the same GOP with new guaranteed rates, surrender charge schedule, and market value adjustment period (if applicable) or take their funds out via surrender, 1035 exchange, or Qualified Transfer without penalty.

Rate Lock

If the annuity application is received in good order within 14 days of the application signed date, the rate is locked for 45 days from the application sign date. If the contract is issued within the 45-day rate lock period as outlined, the contract will be issued with the greater of 1) the locked-in rate(s) or 2) the rate(s) effective as of the date the contract is issued. If the contract is issued beyond the 45-day rate lock period, the contract will be issued with the current rate(s) that are applicable for the Fixed and Index-Linked Account(s) elected as of the contract issue date. If the purchase payment is funded from multiple sources, the contract is issued once all funds specified on the application are received.

FIA Plus™ Rate Sheet

Annuity: Single Premium Deferred

NEW CONTRACT RATES | Effective 08/21/25

The FIA Plus™ is a single-premium, deferred annuity from Ibexis Life & Annuity Insurance Company®. Initial premium may be allocated to the Index-Linked Strategy or the Fixed Interest Strategy, in any combination. All premium allocations are always fully downside protected from market risk. A Floor Limit will be elected at the time of application and may be adjusted on any contract anniversary. Selecting a Floor Limit less than 0% will automatically allocate the Tracking Value to the next available Floor, less than 0%, with sufficient Tracking Value Gains, and will generally provide higher upside potential.

Index-Linked Strategy

Initial premium may be allocated to the Index-Linked Strategy and any of the index options available or Annual Declared Rate, in any combination.

Reallocations may be made on any contract anniversary between the available index strategies by providing written notice on the applicable service form that is mailed at least 30 days before the contract anniversary. Similarly, the Floor may be adjusted by changing the Floor Limit, which is the lowest floor allowed for allocation by the policyholder.

Fixed Interest Strategy

Initial premium may be allocated to the Fixed Interest Strategy and will earn a stated annual interest rate guaranteed for one year. Interest in the Fixed Interest Strategy is compounded and credited to the Strategy Value on a daily basis.

Initial allocations and any transfers to the Fixed Interest Strategy **may not be reallocated** to the Index-Linked Strategy on any contract anniversary.

For a fixed interest strategy with flexibility, consider the Annual Declared Rate Index Option.

Under no circumstances may any person or entity claim any affiliation or association with HSBC or Solactive without the prior written permission of HSBC or Solactive.

In calculating the performance of the AiGT Index, HSBC deducts a servicing cost of 0.50% per annum, calculated on a daily basis. Such costs may vary over time with market conditions. These costs reduce the potential positive change in the AiGT Index and thus the amount of interest that will be credited to the fixed indexed annuity option based on the AiGT Index.

The volatility control applied by HSBC may reduce the potential positive or negative change in the AiGT Index and thus the amount of interest that will be credited to the fixed indexed annuity option that is based on the AiGT Index.
