This material is not authorized for use unless preceded or accompanied by The Power Series of Index Annuities (16110CON) consumer brochure and Owner Acknowledgment and Disclosure Statement. Rates shown are NOT interest rates. See page 4 for applicable minimum rates and other important information. New rates may apply after the end of the first index term and are subject to minimum and maximum guarantees. Minimum or maximum rates apply after the end of the first index term. The participation rate is set at 100% unless otherwise noted.

Key terms and information

Index rate cap: Maximum percentage of index performance that can be credited as interest over an index term. For example: 10% index change > 5% cap = 5% interest earned.

Participation rate: Percentage of index performance that is used to calculate interest. For example: 10% index change x 50% PAR rate = 5% interest earned.

Premium: Money used to purchase the annuity. In Oregon, a Power Series Index Annuity can only be issued with a single premium. No additional premiums are allowed.

Performance-triggered: Initial declared interest rate is credited to the account if index performance is equal to or greater than the minimum index value change. For example: 10% index change → 5% declared interest rate = 5% interest earned.

Note: Enhanced Participation Rate (EPR) accounts are available for an annual fee. You may receive higher interest credits in EPR accounts, but interest credits are not guaranteed. At the end of your contract's withdrawal charge period, if the total amount of EPR strategy fees exceeds the total interest earned in the annuity, the difference will be credited to your annuity.

Index Annuities are issued by American General Life Insurance Company (AGL).

Key terms and information

Enhanced participation rate (EPR): A higher participation rate available in select accounts for an annual fee. For example: **10%** index change x **110%** EPR = **11%** interest earned.

Index rate cap: Maximum percentage of index performance that can be credited as interest over an index term. For example: **10%** index change > **5%** cap = **5%** interest earned.

Participation rate: Percentage of index performance that is used to calculate interest. For example: **10%** index change x **50%** PAR rate = **5%** interest earned.

Premium: Money used to purchase the annuity. In Oregon, a Power Series Index Annuity can only be issued with a single premium. No additional premiums are allowed.

Performance-triggered: Initial declared interest rate is credited to the account if index performance is equal to or greater than the minimum index value change.

For example: **10%** index change → **5%** declared interest rate = **5%** interest earned.
